

Notes Management Web Application using Django

Project Title

Notes Management Web Application

Objective

The objective of this project is to develop a simple web application using Django that allows users to create, view, edit, and delete notes. This helps in understanding basic web development concepts such as database handling, user input, and backend logic.

Technologies Used

- Python
- Django Framework
- HTML & CSS
- SQLite Database

Features

1. Add Notes
2. View Notes
3. Edit Notes
4. Delete Notes
5. Admin Panel

How the Application Works

User enters note details → Data is sent to backend → Stored in database → Displayed on homepage → User can edit or delete notes.

Project Structure

manage.py – Main file

myproject/ – Settings

notes/ – App folder (models, views, urls, templates)

Conclusion

This project demonstrates a CRUD application using Django.
